

## Technical product training „Testomat“

Dear Sir or Madam,

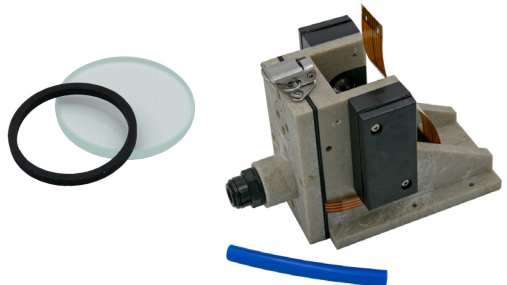

as part of our training program, we regularly offer technical product training on our Testomat instruments.

The seminar is organized in a practical manner and our speaker, Mr. Hesse, addresses open questions and problems as needed.

The training content is primarily taught as practical training in our state-of-the-art technical center.

The focus here is on troubleshooting Testomat equipment.

## Content of the training:

- Basics of photometric analysis
- Technical design and differences between the individual device variants
- Service and maintenance
- Troubleshooting in the event of a fault
- Practical exercises in our technical center
- Mechanical defects and chemical causes
- Causes of errors by means of the internal analysis programs of the testomats

## Target group:

- Service technician/-leader
- Project manager from the field of water treatment
- Technical purchasers
- Employees from specialist planning companies

## Seminar Objective:

The training content is primarily taught as practical training in our technical center. This can & should give the opportunity to actively address current problems.

Note: All training downloads and related technical documentation will be provided in both printed and digital formats.

**All further information and dates for our training courses can be found at:**

*Testomat training: Photometric measurement technology - Neomeris:  
Industry water treatment*

For questions about Testomat training, please contact us at:

Telephone: +49 (0) 5121 7609 - 77 or E-Mail: [seminare@heyhneomeris.de](mailto:seminare@heyhneomeris.de)

Optionally, we also offer our Testomat training courses in English or as in-house training.

**Our training can be booked as a face-to-face event or as a webinar directly in our online shop:**
